Tianze Luo

Undergraduate at Peking University · Yuanpei College · Tong Class

2500017742@stu.pku.edu.cn
github.com/tianzeluo

Undergraduate at Peking University's Yuanpei College, studying in the Tong Class for general artificial intelligence.

Interested in generative models and agent systems, with hands-on experience building desktop tools, open-source plugins, and local-first knowledge systems.

Research interests

Generative models • Agent systems • Open-source research tools

Education

Peking University · Yuanpei College 2025 – 2029 (expected)

Undergraduate, Tong Class (Artificial Intelligence).

Selected projects

OmniStudio 2026

Built a cross-platform Qt desktop workspace that combines Markdown notebooks, code editing, AI assistance, and OpenJudge integration.

DSH Plugin Suite 2026 – present

Designed and maintained plugins for academic search, paper reading, session workflows, and desktop notifications.

Yizhi 2026

Built a local-first knowledge workbench with incremental indexing, cited Q&A, and Docker-based services.

Deep RL Practice 2026

Implemented a unified PyTorch training framework for classic deep reinforcement learning algorithms across Gymnasium environments.

Awards

CUMCM · Beijing Division First Prize 2026

China Undergraduate Mathematical Contest in Modeling, Problem B: fast localization and removal of radio interference sources.

Jiang Zehan Cup · Second Prize 2026

The 23rd Peking University Mathematical Modeling and Computer Application Competition, Problem B: robustness and improvement of transportation networks.

Jiukun Cup Programming Contest · Third Prize 2026

The 24th Peking University "Jiukun Cup" Programming Contest.

Skills

Programming C++17, Python.

ML & simulation PyTorch, Gymnasium, NumPy, Matplotlib.

Systems & tools Qt 6, Docker, Git, Linux.
